Biography

Formed by Guillaume Beringer in 2009, this project is the continuation of a former project called Forlon Hope. The idea was to create a complex psychedelic journey composed by traditional black metal music and more. Still melancholic, the music finds its inspiration in both the essence of life and catatonia. Inspired by bands like Massive Attack, Opeth, Porcupine tree, Katatonia, Anathema, Agalloch etc. The result is a bleak experiment in folk, black, trip hop and prog rock.
